

The email below is being sent to all AMV Associates with email and will be sent via the Associate App.

May 25, 2020

Good Evening,

As you know, Asbury conducted COVID-19 testing on over 500 associates who support the Wilson Health Care Center early last week. Currently, 97.6% of the total results have come in with 2.4% of the results are still pending. Associates with a pending test result, or a result which has not yet been determined, have been notified of their pending status. They will be notified of their result as soon as it is received. **Associates who tested positive have all been notified directly by their supervisor, manager or Human Resources of their positive test.** Currently, the percentage of positive tests is 3.9%. The remaining 93.7% of associates tested all had negative results. **If you have not been notified of a positive or a still pending test result at this point in time, you should consider your result to be negative.**

The current test results are outlined below:

Associate COVID-19 Test Results	
Negative Test Results	93.7%
Positive Test Results	3.9%
Pending Test Results	2.4%
	100.0%

As a reminder, you are able to view and monitor Asbury Methodist Village's current COVID-19 statistics at [Asbury.org/COVID19](https://Asbury.org/COVID19). The dashboard is updated once per day as per the recent CMS guidance.

In addition, all associates tested were required to complete a Relias course to learn more about the testing **procedure** and acknowledge their participation in this important initiative. **Completion of the course was due no later than Tuesday, May 19th.** If you were tested at AMV and have not taken this Relias course, please do so as soon as possible.

If you have any questions about the COVID-19 testing data above, please inquire with your supervisor and/or Human Resources.

Regards,

Tim Leiter, MS, SPHR, SHRM-SCP, CHC  
Director of Human Resources and Compliance Officer  
Asbury Methodist Village
