The number of COVID-19 cases at Asbury Methodist Village is reflective of its geographic location in the center of Montgomery County, Maryland, of having tested *all* its healthcare residents for COVID-19 infection, and its considerable size with 1258 residents and 767 associates. Montgomery County is the jurisdiction with the second largest number of cases in the State of Maryland, and borders Prince Georges County, Fairfax County in Virginia, and Washington, DC, all of which have large numbers of COVID-19 cases. Most of AMV’s associates and their families, as well as many of the families and friends of the residents at AMV, live in Montgomery County or its adjacent jurisdictions. Asbury is privileged to provide essential health care services to older adults in the Greater Washington Metropolitan Area.

*Weekly testing commenced at Wilson Health Care Center July 6, results pending.
