## OUR QUALITY COMMITMENT

Asbury Place Maryville is **CARF** accredited – a designation held by less than 15 percent of continuing care retirement communities.

We strive to return patients to the highest level of independence and back to their homes within the shortest time safely possible.

Functional Pathways' unique Right Track Program provides up-to-date metrics that allow providers, residents and their family members to assess progress towards goals at any time.

# Therapy a BETTER WAY at ASBURY PLACE

## THE SERVICES AND SETTING FOR HEALING

Our Rehabilitative Services Team is part of Asbury Place Maryville, a continuing care retirement community serving seniors with independent living apartments and homes, assisted living, memory support and skilled nursing. Post-acute care residents and their families have access to our beautiful campus and its amenities.

Asbury Place practices person-centered care, which works with individuals and their families to set goals and establish their preferences for how and when they receive services during their stay in the Health Care Center. We strive to create a care setting that is as close to the resident's everyday routine as possible.
