## A Message from Executive Director Lauren Dieter

Feb. 16, 2021

Dear Residents & Family Members,

We are excited to share that the Normandie Ridge Nursing Care Center is offering the latest in COVID-19 treatment, monoclonal antibody therapy. This infusion treatment has been shown to reduce the severity of COVID-19 symptoms and patients' rate of hospitalization, and was approved under the FDA's Emergency Use Authorization (EUA) status in November 2020. We have successfully treated several individuals with monoclonal antibody therapy since we began offering it in partnership with CVS Pharmacy earlier this year.

In general, criteria for this treatment includes:

- Age 65-plus experiencing mild to moderate symptoms of COVID-19
- Chronic conditions that increase risk of hospitalization (includes obesity, diabetes, issues that compromise heart, lung, or kidney function or sickle cell anemia)

**What does this mean for you or a loved one who has tested positive with COVID-19?**

- **Residents of the Nursing Care Center and the Personal Care Center** will automatically be evaluated to determine if the criteria is met for this treatment.
- **Residents of Independent Living** may contact Robin Halcomb, RN, at 717-718-1022, who can help you facilitate this treatment process with your physician.

If you would like to learn more about this groundbreaking treatment, please [click here](#) to view our website.

Sincerely,

**Lauren Dieter, NHA MBA**

Executive Director

Normandie Ridge Senior Living Community
