A Message from the Executive Director

Feb. 16, 2021

Dear Residents & Family Members,

We are excited to share that ForestView Health Care Center is offering the latest in COVID-19 treatment, monoclonal antibody therapy. This infusion treatment has been shown to reduce the severity of COVID-19 symptoms and patients' rate of hospitalization, and was approved under the FDA's Emergency Use Authorization (EUA) status in November 2020. We are proud to join several of our sister Asbury communities in rolling out this groundbreaking treatment. Please [click here](#) to read one individual's experience.

In general, criteria for this treatment includes:

- Age 65-plus experiencing mild to moderate symptoms of COVID-19
- Chronic conditions that increase risk of hospitalization (includes obesity, diabetes, issues that compromise heart, lung, or kidney function or sickle cell anemia)

What does this mean for you or a loved one who has tested positive with COVID-19?

- **Residents of ForestView Health Care Center and OakView Personal Care** will automatically be evaluated to determine if the criteria is met for this treatment.
- **Residents of Residential Living** may contact Emily Hill, RN, at 814-860-7028 who can help you facilitate this treatment process with your physician.

Sincerely,

Jane Gibson
Executive Director
